

The system will have only 2 roles - USER and ADMIN.

See below the permissions matrix that reflects the only functionality in the app with different access for these two roles:

| <b>Administrator's general reports (general expenses, user demographics, average saving percent)</b> |             |              |
|--|-------------|--------------|
|  | <b>User</b> | <b>Admin</b> |
| Create report  | -           | +            |
| Read report  | -           | +            |
| Update report  | -           | -            |
| Delete report  | -           | -            |
| <b>FAQ</b>   |             |              |
| Create FAQ   | -           | +            |
| Read FAQ   | +           | +            |
| Update FAQ   | -           | +            |
| Delete FAQ   | -           | +            |
