Vision statement:

For adults who care about their financial state, want to know where they spend money, the Budget Planning App is a web-application that allows you to:
- keep track of income and expenses in the context of various categories,
- set limits for expenses and get notifications when you spend too much,
- generate different types of reports with detailed cost analytics,
- organize the accounting of savings,
- store electronic copies of financial documents.

Unlike other apps,
